

Recommended game:

# Unflip it!

(designed for classroom play)

Players (4): Two **tortoises** and two **predators**.**MATERIALS**

- 2 tortoise shells
- 2 tortoise nests (tan)
- 1 predator nest (grey)
- 10 orange eggs (tortoise 1)
- 10 yellow eggs (tortoise 2)

**SAFETY**

We want you to stay safe. Please follow all of these instructions!

- Please keep hugging your knees while you flip until you've flipped over. Don't push on the ground with your hands.

**TORTOISES**

Each tortoise gets **one shell!** Put it on, get on your back, and **tighten it around your shoulders**

It's easiest to get on your back if you sit down and lean back, tucking the shell underneath you. Adjust your weight until you feel stable on your back!

**GAME SETUP**

The two tortoises should be on their backs, behind their nests, with the predator in front of them.

**HOW TO PLAY***Listening for predators!*

The predators will alternate calling out random animals\*. If you hear one of the following three: **Hawk**, **Coyote**, or **Fox**, both tortoises will need to un-flip and protect their nests!

*Predator: \*Attached is a list of non-predator animal names if you can't think of any!*

*Protecting the nest!*

Starts when Predator calls out Hawk, Coyote, or Fox

**Tortoises**

1. Un-flip by rocking side to side!
2. Scramble over to the nest and try to cover it with your hand before the Predators take all of your eggs!

**Game ends:**

**Repeat these steps** until there are no more eggs in one of the tortoise's nests

**Predators**

1. Each predator will reach into one of the tortoise's nests and try to grab their eggs!
2. Transfer any eggs you grab out into the grey bag
3. You're allowed to continue grabbing eggs as long as the tortoise isn't covering the bag! **NOTE:** If the predator's hand is in the nest when the tortoise covers it, the predators must release the eggs in their hand immediately .
